**DALBELLO IS AN ITALIAN SKI BOOT SPECIALIST FOUNDED IN 1974 BY SENIORE DAL BELLO, A TRUE SHOEMAKER. BEING LOCATED NEXT TO THE MOUNTAINS IN A PLACE CALLED ASOLO, DALBELLO IS ONE OF THE VERY FEW SKI BOOT MANUFACTURER STILL PRODUCING IN ITALY.**

Italian sensitivity for unique and advanced design, technological solutions and the passion for the boot made Dalbello a top performing brand, supporting top athletes in freeriding and world cup racing. In 2021 Andri Ragetti became slope style world champion and won the X-Games Big Air contest. His team partner Nick Goepper took home the X-Games Slopestyle gold medal. Sebastian Foss-Solevåg became Slalom World Champion with Adrian Perth finishing second. And the list goes on and on ...

Behind the victories is a huge team of outstanding athletes who have a lot of influence on the product and its performance. Their experience and daily use lead to a permanent progression and continuous improvements. The team works very close with inhouse engineers and designers and is a true member of the global Dalbello family.

The power of the „Italian family“ spirit is an important part of Dalbello´s corporate culture and the brand is very proud about these unique values and the people supporting Dalbello´s ideas and vision.

Of course with a production of up to 2.000 ski boots per day we are taking our ecological responsibilities extremely serious. Since 2021 we cover our energy needs exclusively from renewable sources. By being a part in EU´s Repair 3D project we incorporate 3D printers in our boot production which then contain up to 70% of recycled materials. Our main production being in Asolo allows us to keep the transportation ways as short as possible. Together with the University of Bologna we constantly explore new ways to manufacture our products as clean as possible with the use of pollutants reduced to a minimum. In this context we have also joined the LIFE RESKIBOOT program. Until 2027 we plan a waste reduction of around 36 tons and a greenhouse gas reduction of 130 tons.

## OVERLAP DESIGN

- + POWER
- + PRECISION
- + CONTROL

### BEHAVIOR

- Immediate power transmission
- Shorter range of flex
- Traditional powerful rebound
- Precise control
- Traditional skiing style primarily on-piste / where extreme precision is needed

### SPECIFIC TECHNOLOGY

#### DRIVE & CONTROL

More volume in the toe box for:

- Better fit
- Better blood circulation
- Warm feet and toe

Precise wrapping heel zone for:

- More control
- Direct power transmission
- More sensitiveness

#### RACE

## CABRIO DESIGN

- + VERSATILITY
- + FLEXIBILITY
- + LESS EFFORT

### BEHAVIOR

- Smoother and progressive power transmission
- Long range of flex
- Dynamic rebound
- Excellent shock absorption
- Quicker from edge to edge
- All terrain

### SPECIFIC TECHNOLOGY

#### DYNALINK

- Independently functioning heel / instep closure assembly
- Minimizes foot sliding, heel lift and boot shell distortion during flex effectively

#### KINETIC RESPONSE TONGUE

- Highly resilient polyamide flex ribbed tongue
- Stays in permanent contact with the leg
- Improved responsiveness and control
- Interchangeable flex stiffness

#### SKI-HIKE

- Burlly cuff lock mechanism frees the upper cuff from the lower shell
- Long range of motion for highly functional hiking and climbing
- No compromise on skiing performance due to unique cabrio design
