ANTON KÄSTLE SENIOR
FOUNDER KÄSTLE SKI

GESCHICHTE HISTORY

1924 fertigt Anton Kästle in seiner Hohenemser Wagereiwerkstätte sein erstes Paar Ski und startet damit eine Erfolgsgeschichte, so vielseitig wie die Modelle, die auch heute noch unter dem ehrwürdigen Namen hergestellt werden.

Kästle blickt stolz auf eine vor allem im alpinen und nordischen Rennlauf stark verwurzelte Historie zurück. Toni Sailer, Pirmin Zurbriggen, Anita Wachter, Hubert Strolz, Tom Stiansen, Anette Bøe und weitere Meister ihres Fachs gewinnen auf Kästle Ski in Summe 133 Medaillen bei Olympischen Spielen und Weltmeisterschaften und verschaffen der Marke Ende der 1970er-Jahre endgültig Kultstatus.

2007 setzt Kästle einen neuen Maßstab in der Skibranche, indem eben diese Erfahrungen und Konstruktionstechnologien aus dem Rennlauf für die Serienproduktion der Allmountain-Ski verwendet werden.

2019 kehrt Kästle in den alpinen und nordischen Ski-Weltcup zurück. 2021 vertreten Athleten die Marke bei den Weltmeisterschaften in Cortina D'Ampezzo und Oberstdorf. Heute wie damals setzt Kästle noch immer visionäre Ideen in innovative Produkte um – an den Produktionsstandorten im Langlauf-Mekka Nové Město na Moravě sowie am Headquarter in Hohenems; dort, wo alles begann.

In 1924, Anton Kästle built his first pair of skis at his wainwright workshop in Hohenems, Austria. In doing so, he kicked off the success story as versatile as the ski models that would follow, which are still built under his dignified name.

Kästle proudly looks back on a history that is deeply rooted, particularly in Alpine and Nordic racing. Toni Sailer, Pirmin Zurbriggen, Anita Wachter, Hubert Strolz, Tom Stiansen, Anette Bøe and countless other skiing legends would win 133 Olympic and World Championship medals in total, ultimately elevating the brand to cult status in the late 1970s.

In 2007, Kästle once again set standards for the whole industry: taking construction technologies from racing and applying them to series production of their all-mountain skis.

Kästle has been back on the Alpine and Nordic World Cup since 2019. Athletes represented the brand at the World Championships in Cortina d'Ampezzo as well as Oberstdorf last year. Now, as then, Kästle is still transforming visionary ideas into innovative products – at its production sites in the cross-country skiing mecca of Nové Město na Moravě as well as at its headquarters in Hohenems, where it all began.

ALPINE

Der Fokus auf die beste Performance ist tief in unserer Geschichte verwurzelt. Ein vorausschauendes, unkonventionelles Mindset, das Streben nach Innovation, die Liebe zur Technologie und zum Detail – sie alle sind Teile des Kästle Ursprungs. Er ermutigt uns dazu, die Geschichte fortzuschreiben und die wichtigsten Komponenten unserer Produkte neu zu gestalten.

Die neue Kästle Race & Performance Skischuhfamilie. Für ambitionierte und leidenschaftliche Skifahrer. Für diejenigen, die keine Grenzen kennen. Für die Fokussierten, die auf der Suche nach dem perfekten Schwung sind. Für diejenigen, die #FastAsEver sein wollen.

Focusing on top-performance is deeply rooted in our history. Forward, out of the box thinking, striving for innovation, cutting-edge technology and attention to detail are at the heart of Kästle. It empowers us to continue the story and re-think our product's most crucial components.

The new Kästle race and performance ski boot family. For ambitious and passionate skiers. For those without limits. For the focused ones, who are always looking for the perfect turn. For those, who want to be #FastAsEver

RX12 FACTORY

COMPETITION

Racing liegt uns im Blut. Die Liebe für Speed ist tief in unserer DNA verankert. Das Streben nach Rekorden bestimmt unseren Alltag.

Schnelle Ski bauen, die beste Performance für unsere Kunden bieten – das wollten wir schon immer. Seit 1924 leben wir diese Philosophie – auch lange nach den weltbekannten Erfolgen im verrückten Weltcup-Geschehen der 70er- & 80er-Jahre. Mit bewährten Technologien aus dem Rennlauf haben wir unsere Serienmodelle gefüttert und Pioniergeist bewiesen.

Nun sind wir zurück auf der großen Bühne und wollen unsere Leidenschaft für Racing erneut unter Beweis stellen.

Racing is in our blood. The love for speed is deeply rooted in our DNA. The pursuit for records determines our everyday life.

Building fast skis, offering the best performance for our customers – that is what we have always wanted. We live by this philosophy since 1924 – even long after the world-famous successes during the crazy World Cup scene of the 70s & 80s. We have filled our series production with proven technologies from racing, demonstrating true pioneering spirit.

Now we are back on the big stage and want to put our passion for racing to the test again.

PISTE

Ursache – Wirkung

Ohne Aktion gibt es keine Reaktion.
Eine Gleichung, die uns seit fast 100 Jahren begleitet.

Pioniergeist bewegt das scheinbar Unmögliche.
Mit jeder neuen Technologie wächst der Vorsprung weiter.

Unsere Geschichte treibt uns täglich zu Höchstleistungen.
Jede Aufgabe trägt uns weiter in Richtung Perfektion.

Neuer Ruhm entsteht aus Legenden.
Entwickelt in Österreich – bereit Rekorde zu brechen.

Die Kästle RX-Linie – fürs Rennen bestimmt und im Race-Design erschaffen, bietet Weltcup-Feeling für jedermann.

Cause - Effect

Without action there is no reaction.
This equation has accompanied us for almost 100 years.

The pioneering spirit redefines what is possible.
With technology, the advantage grows.

Our history drives the pace. Every challenge brings us closer to perfection.

New fame grows from past legends. Born in Austria – ready for records.

The Kästle RX12 line: destined for speed and – thanks to its race-inspired design - providing a World Cup feel to everyone.

PISTE

Samstag, 8 Uhr morgens. Der Schnee knirscht unter den Füßen beim Aussteigen aus der Gondel. Es ist bitterkalt, aber die ersten Sonnenstrahlen blinzeln bereits hinter den Berggipfeln hervor und wärmen das Gesicht. Das frühe Aufstehen hat sich gelohnt – leere Pisten so weit das Auge reicht.

Rein in die Ski! Klack – klack! Zweimal mit den Stöcken richtig antauchen. Die Bretter fegen über die frischen Rillen der Pistenraupe. Zuerst einfach geradeaus fahren, um Schwung zu holen. Dann die Kanten umlegen. Ssst, ssst, ssst – das einzige Geräusch, das zu hören ist.

Die PX-Linie – für alle Liebhaber der präparierten Pisten, denen das Herz höherschlägt, wenn sie bei tiefen Turns mit der Hand in den Schnee greifen.

Saturday, 8 AM. A crunch of snow underfoot when getting out of the cable car. The temperature is freezing, but the first rays of sunlight are already peeking out from behind the mountain peaks and warming the face. Getting up early was worth it – empty slopes as far as the eye can see.

Put on those skis! Clack – Clack! Double push with the poles. The skis run over the freshly groomed snow. First, just straight ahead to build up speed. Then, turn the edges. Ssst, ssst, ssst – is the only sound that can be heard.

The PX line – for all lovers of groomed slopes, whose hearts race when they press their hands against the snow during fast turns.

KX

PISTE

Es sind die kleinen Erfolge im Leben, die uns einmal ganz groß werden lassen.

Beim ersten Schnee im Garten mit den Ski vom Christkind kleine Schritte wagen. Das erste Mal richtig bremsen nach stundenlangem Pflug-Üben. Die ersten Kurven durch den Stangenwald. Und der Stolz könnte nicht größer sein.

Egal welches Alter oder welcher Fahrstil, wir bringen Kids sicher und vor allem mit ganz viel Spaß durch den Winter.

Denn wer sagt, dass nur Erwachsene Kenner sein können?

The small successes in life are the wins that make us feel great every day.

Daring to take small steps in the garden with skis brought by Santa Claus at the first snowfall. Coming to a stop properly for the first time, after hours of practicing. The first turns through gates. The pride could not be bigger.

No matter what age or skiing style, we provide kids with a safe environment and, above all, fun throughout the winter.

After all, who says that only adults can be true skiers?

ALL-MOUNTAIN

Für Tage, an denen man sich nicht entscheiden möchte. Wenn früh morgens harte Piste und am Nachmittag weicher Frühlingsschnee auf einen warten. Wenn man präparierte Hänge liebt, aber den einen oder anderen Abstecher ins Gelände nicht missen möchte. Je nach Mittelbreite perfekt auf die verschiedensten Präferenzen abgestimmt und für jedes Abenteuer bereit.

Eine legendäre Allmountain-Performance dank patentierter Technologien aus dem Rennsport. Für einen Ski, so vielfältig und kompromisslos wie der Winter selbst.

Designed for days when you don't want to make a choice. When there are icy slopes early in the morning and soft corn snow in the afternoon. When you love groomed slopes, but don't want to miss a detour or two off piste. Perfectly tuned to a wide range of preferences depending on the waist width and always ready for any adventure.

Legendary all-mountain performance thanks to patented technologies, inspired by racing. A ski as versatile and uncompromising as winter itself.

ALL-MOUNTAIN

Ein wahrer Genießer! Ein Skitag ist dann perfekt, wenn er optimal ausgenutzt wurde. Kräftesparend und mühelos den Winter genießen, das ist das Credo. Die unterschiedlichsten Schneebedingungen schrecken nicht ab, kann man sich doch in jeder Situation auf das eigene Können verlassen. Doch stille Wasser sind bekanntlich tief. Man sollte niemals das Potenzial und den eigenen Willen unterschätzen, mehr zu wollen. Genügend Reserven für kraftvolle Carvingsschwünge sind ja auf jeden Fall vorhanden.

Ausgeglichen, aber dynamisch zugleich – bereit für alles, was der Winter zu bieten hat.

A real delight! A ski day is perfect when it is lived to the fullest. Casually and effortlessly enjoying the winter, that is the credo. Whatever the conditions, you can rely on your own skills in every situation. The passion runs deep: never underestimate one's potential and will to strive for more. After all, there's no shortage of opportunities for beautiful, powerful carving turns.

Balanced but dynamic at the same time - ready for everything the winter has to offer.

FX

FREERIDE

FX

Ein Freerider mit Race-Genen, so könnte man den FX Ti eigentlich nennen. Vollgepackt mit Innovationen wie der neuen TRI-Ti Technologie und dem HOLLOWTECH 3.0 sind die FX Ti geboren fürs freie Gelände. Ausgerüstet mit unserem DUAL RISE sind sie optimal vorbereitet für den perfekten Float durch herrlichen Tiefschnee.

Wer aber glaubt, dass hier Schluss ist, hat sich gewaltig geirrt. Zwei zusätzliche Titanalschichten bilden das Herz der FX-Ti-Linie und verleihen dem Ski die nötige Stabilität für kraftvolle Turns auf harten Pisten. Keine Kompromisse eingehen? Dann ist der FX Ti die Waffe für den Winter.

Call them a freerider with race DNA! Packed with innovations, such as the new TRI-Ti Technology and HOLLOWTECH 3.0, FX Ti skis are born for the mountains. Together with DUAL RISE they are designed for perfect float through beautiful, deep snow.

But if you think this is the end of the story, you are sorely mistaken. Two additional titanium layers form the heart of the FX Ti line and give the skis the necessary stability for powerful turns on hard slopes. No compromises accepted? Then the FX Ti is the weapon for the winter.

ZX

FREERIDE

Drei, zwei, eins – Dropping!
Der Blick auf ein Meer aus Weiß. Ein tiefer Atemzug. Der Absprung. Ein kurzer Moment der Schwerelosigkeit. Wie bei einer Achterbahnfahrt macht der Magen einen kleinen Sprung. Der Powder reicht heute bis zum Bauchnabel. Bei jedem Schwung prasselt noch mehr Schnee ins Gesicht. Mund zumachen wäre angebracht, aber wie denn, wenn man vor lauter Freude nicht aufhören kann zu grinsen. Egal welches Alter, egal wie tief man im weißen Glück steckt, egal wie weit oben man auf der Draufgänger-Skala steht – der ZX ist das Powder-Spielzeug für den Winter.

Three, two, one – Dropping!
Gazing at a sea of white. A deep breath. An air. A brief moment of zero gravity. Like a roller coaster ride, the stomach does a little jump. The powder reaches up to your belly button today. With every turn, more snow pelts your face. Shutting your mouth would be appropriate, but how, when you cannot stop smiling from the sheer joy of it? No matter what age, no matter how deeply you obsess about the mountains, no matter where you stand on the daredevil scale – the ZX is the powder toy of choice for the winter.

ZX^α ALPHA

FREERIDE

Alpha ist der erste Buchstabe des griechischen Alphabets und steht daher für den Anfang.

Dreht man das kleine Alpha α um 90 Grad nach links, kann man außerdem einen Stierkopf erkennen. Der Stier – willensstark, ausdauernd, aber immer treu.

Das ist unser ZX Alpha – robust und stabil konstruiert, ist er der treue Begleiter aller Mini-Draufgänger. Perfekt für die ersten Powder-Days der neuen Generation. Für alle Young Guns, die ihrer Mama gerne mal einen Schrecken einjagen.

Alpha is the first letter of the Greek alphabet and therefore represents the beginning.

If you turn the small alpha α 90 degrees to the left, you can also see a bull's head. The bull: strong-willed, persistent but always loyal.

This is our ZX Alpha – robust and sturdily constructed, it is the faithful companion of all mini daredevils. Perfect for the new generation's first powder days. For all the young guns who like to scare their moms.

TX65 WORLD CUP

COMPETITION

Wer glaubt, dass es sich beim Skimountaineering um ein bisschen schnelleres Tourengehen handelt, ist gewaltig auf dem Holzweg.

Beim Skimo nutzen unsere Athleten ihre bergsteigerischen Fähigkeiten, um durch verschneite Berge zu rasen – die Königsklasse des Bergsports auf Ski!

Eine Extremsportart, die nach extremem Material verlangt und ab 2026 übrigens auch olympisch ist.

Mit gerade mal 690 Gramm ist der TX65 WC der leichteste Alpinski, den wir jemals gebaut haben. Wichtig natürlich, wenn unsere Athleten so kräftesparend wie möglich zum Gipfel kommen wollen. Ihre Reserven benötigen sie dann für die Abfahrt, bei denen wir ihnen mit zwei Karbon-einlagen und maximaler Stabilität zur Seite stehen.

If you think ski mountaineering is just some sort of fast touring, you are sorely mistaken.

In skimo, our athletes use their mountaineering skills to race through snowy mountains – the ultimate test of mountain skills on skis, if you will!

An extreme sport that demands extreme equipment and, by the way, will be an Olympic event starting in 2026.

At just 690 grams, the TX65 WC is the lightest alpine ski we have ever built. Minimal weight is of course crucial, as our athletes want to get to the summit in the most energy-efficient way possible. They need their energy for the descent, where we support them with two carbon inlays and maximum stability.

TX TOUR

Der Weg ist das Ziel, sagte Konfuzius einmal. Der Aufstieg kann so atemberaubend sein wie die Aussicht am Gipfel selbst. Ganz alleine geschafft! Ohne Lift, ohne Gondel, ohne Hilfe. Der Wille hat einen hier herauf gebracht. Was vor einem liegt, lässt kurz innehalten. Beim Anblick der Landschaft vergisst man fast die Anstrengungen des Aufstiegs. Und wofür man sich das überhaupt angetan hat: die Abfahrt! Sie gehört einem ganz allein. Schwung für Schwung die scheinbar unendlichen Möglichkeiten ausnutzen. Bis man den Weg zurück findet. Dort hin, wo alles angefangen hat. Was bleibt, ist der stolze Schulterblick zurück auf den Gipfel und die Sicherheit, dass man wieder hierherkommen wird.

As Confucius once said, the journey is the destination. The climb can be as breathtaking as the view at the summit itself. Accomplished all by yourself! Without a chairlift, without a cable car, without help. It was willpower that got you up here. What lies ahead causes you to pause for a moment. With the sight of the scenery you almost forget the effort of the ascent. And the reason why you did it in the first place: the ride down! It belongs to you alone. Turn after turn, taking advantage of the seemingly endless possibilities. Until you find your way back. Back to where it all began. What remains is the proud look at the summit and the certainty that you will return here.

TOUR

Frische Luft einatmen, mit der Natur im Einklang sein, das Gefühl von Freiheit ...

Dinge, die wir gerade im letzten Jahr wertzuschätzen gelernt haben. Kein Wunder also, dass das Tourengehen einen neuen Boom erlebt.

Stabil und robust konstruiert, bieten unsere TX UP höchste Fahrperformance für den erfahrenen Tourengänger. Aber auch all jene, die diesem Ruf erstmals gefolgt sind, finden in ihm den perfekten Begleiter und die nötige Sicherheit bei ersten Gipfelerlebnissen.

Taking deep breaths of fresh air, getting in touch with nature, the feeling of freedom ...

Things we learned to appreciate, especially during the last year. No wonder ski touring is experiencing such growth.

Stable and robustly constructed, our TX UP line offers maximum performance for experienced and unexperienced skiers alike. Even those who follow this call to tour in the mountains for the first time will find the perfect companion and necessary confidence for their first summit experiences.

W VOGUE

Eine eigene Damenkollektion – wozu eigentlich?! „Die Frau von heute“ ist doch ohnehin stark und unabhängig, da braucht sie doch gar keine gesonderte Behandlung. Warum also die Kästle VOGUE-Linie?

Weil wir Frauen hochleben lassen möchten. Weil sie es verdienen, besondere Aufmerksamkeit zu genießen. Weil sie keine Abstriche machen und keine Kompromisse eingehen sollten. Schon gar nicht bei etwas, das so viel Spaß machen kann.

Wir feiern sie, auf der Piste, im Gelände, beim Tourengehen – immer und überall!

A collection specifically designed for women – what's the point? "The modern woman" is strong and independent anyway, why would she need any special treatment. Why do we need the Kästle VOGUE line?

Because we want to celebrate women. Because they deserve special attention. Because they should never cut corners or compromise. Especially not on something that can be so much fun.

We want to celebrate them, on the slopes, in the backcountry, when touring – always and everywhere!

TOUR

Schick in Schale geworfen! Zuverlässig und stark! Und, mein Gott, kann man mit ihnen Spaß haben ...

Natürlich reden wir von den neuen Kästle Ladies-Tourenski!

Wir wissen, was sich Frauen wünschen – nicht weil wir allwissend sind, sondern weil wir sie einfach gefragt haben! Darum haben wir unsere VOGUE Kollektion um zwei Tourenmodelle erweitert. Das Resultat daraus: stabile, angenehm leichte Ski, die ihre Fahrerinnen trotz gewohnter Kästle Performance nie im Stich lassen.

Ladys, wie kann man zu diesen Prachtexemplaren Nein sagen?

Dressed up fancy! Reliable and strong! And, my God they are fun ...

Of course we are talking about the new Kästle Ladies touring skis!

We know what women want - not because we are omniscient, but because we simply asked them! That is why we have added two touring models to our VOGUE collection. The result: stable, pleasantly lightweight skis that never let their riders down, thanks to the usual Kästle performance.

Ladies, how can you say no to these beauties?

Legendary Collection

Unsere Legendary Collection verkörpert die Meisterklasse des Skibaus. In liebevoller Handarbeit werden 30 Einzelteile in unserer Manufaktur verpresst.

Doch nicht nur die Werkstatt in Hohenems erinnert an vergangene Zeiten. Für die Legendary Collection haben wir unsere schönsten Designs aus den 1950er- und 1960er-Jahren wieder aufleben lassen. Selbstverständlich verfolgen wir aber auch hier unseren altbewährten Grundsatz „Form follows function“. So elegant die Ski auch glänzen, keiner muss hier auf die gewohnte Kästle Performance verzichten.

Our Legendary Collection embodies the master class of ski manufacturing: 30 individual parts are lovingly hand-pressed in our workshop.

Our legacy in Hohenems isn't the only thing that's representative of times gone by. For the Legendary Collection, we have revived our most beautiful designs from the 1950s and 1960s. Of course, we also follow our long-standing principle of „form follows function“. As elegant as the skis shine, no one has to go without the usual Kästle performance.

SPECIALS

„Special“, weil es schon ein spezielles Mindset braucht, um sich diese Schmuckstücke an die Füße schnallen zu wollen.

Der Name Firngleiter (kurz Figl) erklärt eigentlich schon alles: ein Gerät zum Gleiten durch den weichen Frühjahrsschnee. In den 1930er-Jahren entwickelt sind sie der perfekte Begleiter beim spätwinterlichen Bergsteigen, wenn für die geliebten Tourenski nicht mehr genügend Schnee liegt. Dank ihrer Konstruktion stellen sie beim Aufstieg kein großes Hindernis da, erleichtern den Abstieg in schmalen und schneearmen Rinnen aber ungemein. Klingt nach Spaß und das macht es auch!

Je kürzer der Ski, umso kürzer die Schwünge? Könnte man fast meinen beim Anblick unseres Shortys. Optimal für das Slalomtraining konstruiert, explodieren deine Short Turns förmlich mit ihm.

Die Königsklasse der Specials bilden unsere Aerials und Moguls. Speziell für unsere Freestyle-Athleten entwickelt, kommen sie bei Bewerben in der Skiakrobatik und beim Buckelpistenfahren zum Einsatz.

They are called „Specials“ because it takes quite the special (and fun) mindset to be willing to strap these gems to your feet.

The name „Firngleiter“ (Figl for short) actually says it all: a device for gliding through soft spring snow. Developed in the 1930s, they are the perfect companion for late-winter mountaineering when there is not enough snow for the beloved touring skis. Thanks to their construction, they climb easily yet still provide confidence and efficiency when descending narrow, snowy couloirs. Sounds like fun? Well, it is!

The shorter the ski, the shorter the turns? Looking at our Shorty you might very well think so. Perfectly designed for slalom training, your short turns will become explosive and powerful thanks to these tools.

The aerial and mogul skis are the royal class of our Specials. Specifically developed for our freestyle athletes, they are used in ski acrobatics and mogul skiing competitions.

G13 KÄSTLE RX GLORYFY UNBREAKABLE MEETS KÄSTLE
ITEM.NO. GB447
 Variant: black | mint
 Focus: sport | glasses adjust according to light conditions
 Glass: F1-F3 Transformer | UV 400

UNBREAKABLE & MADE IN AUSTRIA
 Lenses and frame are unbreakable thanks to the material NBFX – protects during sports and is also very practical in everyday life. The lenses and frame return to their original shape due to the material's memory when bended. Perfect wearing comfort thanks to one of the lightest materials in the optical industry.
