PERFECT BALANCED FLEX

TRUEBLEND WOODCORE

Trueblend is Blizzard's foundational woodcore technology which allows us to specifically design every model and size for the target customer. We select specific woods, characterized by different densities, blending and positioning them to form woodcores that are designed to optimize the flex of and deliver a smooth and balanced feeling. This

technology also allows Blizzard to build skis that pack a tremendous amount of performance but that are not hard to ski.

Each product family has a distinct Trueblend in order to optimize the right performance, control, and confidence.
